Unified Threat Management

# NETASQ Multifunction Firewall U Series

NETASQ U30

NETASQ U70

*High Performance to Secure your Future*

P2 Client testimonials

P3 Appliance features

P4 Technical specifications

U30 and U70 models in the U Series are the ideal security solutions for SMEs or large subsidiaries. The performance and level of security of the U Series make the U30 and U70 appliances efficient and durable solutions.

## Out-of-the-range performance

U30 and U70 appliances are the fruit of years of research and development, which have resulted in the total synergy of the hardware and software architectures (the development of security features at the heart of the network operating system). As such, they are capable of unequalled performance in terms of intrusion prevention. Embedded also on each U30 and U70 appliance is a VPN solution, which ensures the secure, high-throughput interconnection of sites.

*Find out the technical specifications on pages 3 and 4*

## Guaranteeing your security

The core of the NETASQ Firewall U Series centers around its proprietary system which embeds firewall features and real-time intrusion prevention. The NETASQ Firewall analyzes network protocols in order to detect and block threats, and thanks to numerous behavioral analyses and different targeted signature databases (depending on the context), it delivers a very high level of security by automatically reducing the risk of false alarms.

*More information is available on <http://asq.netasq.com>*

## Complexity is key

The U Series comes with an administration suite that also monitors your network environment in real time. These tools guide you step by step so that you not only adapt in real time but also fully adapt the protection to your needs. Furthermore, the suite allows you to generate automatic reports to take stock of changes in threats to your network.

### SECURITY

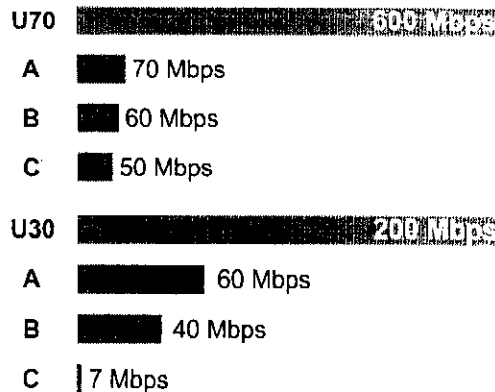

- Zero-day intrusion prevention
- Real-time IPS management
- Antivirus > 200 000 viruses
- Antispam up to 100 000
- Pre-configured IPS signatures

### PERFORMANCE

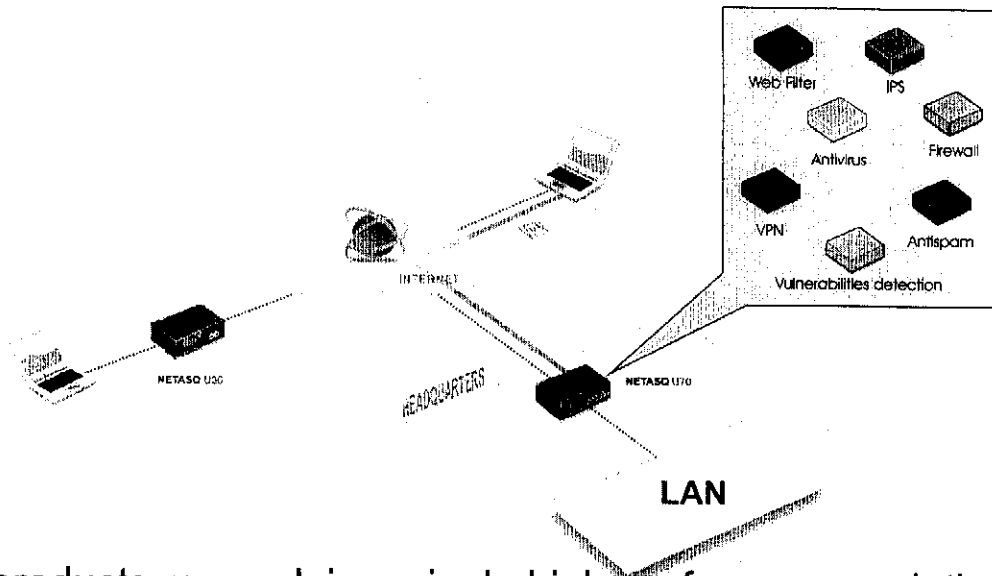

U Series Firewall  
IAB 0.0 profile compliance

*Always download*

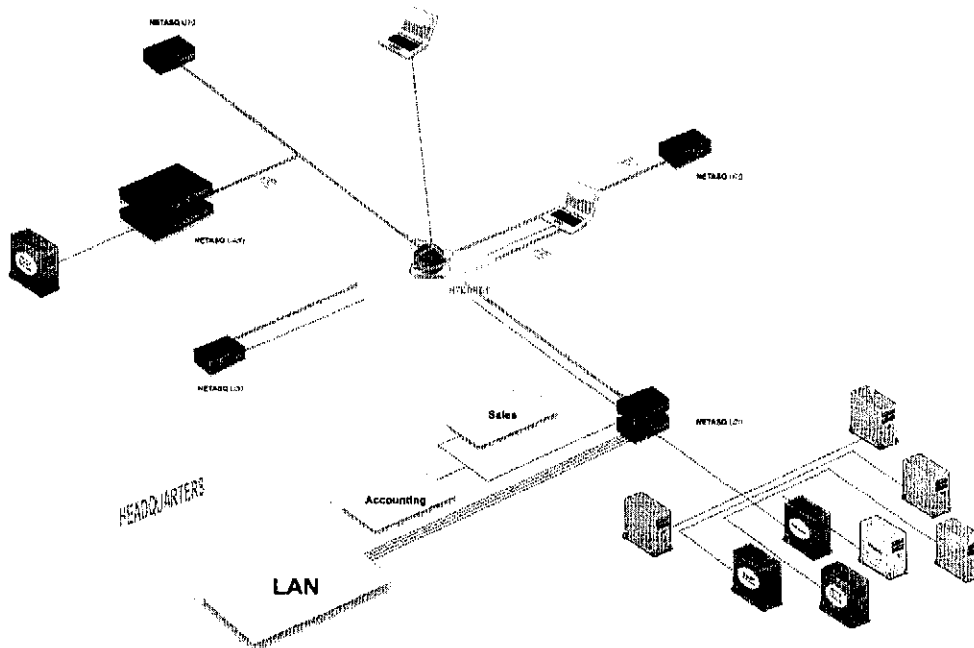

## security products merged in a single high-performance solution

U30 and U70 products are multi-function firewalls that combine many security modules. They offer SMEs the same level of security applied to large corporate entities, while keeping in mind their budget restrictions. Automatic updates of IPS, antivirus, antispam and URL databases are a further guarantee of quality for administrators of SME networks, who typically have limited amounts of time to dedicate to managing their information systems.

*NETASQ products have an excellent intrusion prevention system, no doubt about it. We mainly use the IPS as well as the classic features that one would find on any firewall. However, one of the aspects that appealed the most to us was the simplicity and intuitiveness of the product. We are assured that teams in the local economic departments can see to the watertight protection of their data on their own."*

**Fabien Marechal**, Manager, information security, Ministry of the Economy, Industry and Employment (France)

<http://www.netasq.com/en/netasq/success-story.php>

## protect your subsidiaries

U30 and U70 appliances are used in securing the remote agencies of multi-site companies. The VPN interconnection, which uses hardware acceleration, provides a high level of security for all transactions. Furthermore, software resources are fully available for conducting all the security analyses necessary for the protection of the subsidiaries. NETASQ administration tools greatly facilitate the

## About NETASQ

NETASQ is a growth and innovation private technology company, focused on delivering the highest level of network security to all its customers from SMB to large private and public organizations.

One of the leading European network security vendors, we have sold over 55,000 products worldwide via a distribution channel of 750 partners in 40 countries.

Our solutions give our customers assurance that a security threat will never jeopardize their activity. We contribute to their success by enabling business continuity and allowing them to focus 100% of their effort on growing their business.

As computing threats grow more prevalent, dangerous and diverse we continue to develop innovative solutions to protect our customers' data, their communications and their network.

DATE: **16 JUL 2012** BY: *Shari*

Dear Ms. Reyes:

We are pleased to inform you that after the tie-breaking activity conducted last 4 July 2012, you have been determined to be the winning supplier for the procurement of **FIREWALL** with a corresponding bid price of **NINETY FIVE THOUSAND PESOS (P95,000.00)**.

We shall send the Purchase Order for the said project at the soonest possible time, unless a request for reconsideration by any of the unsuccessful bidders filed within the period prescribed under Section 55.1 of the Implementing Rules and Regulations of Republic Act 9184 is found meritorious.

We appreciate your interest in this opportunity and we look forward to the satisfactory performance of your obligations under the project.

Very truly yours,

*[Handwritten Signature]*  
**DENNIS S. SANTIAGO**  
 Executive Director III
